## Conquered at Last.

BY MRS. A. ELMORE.

[美國英國英國英國英國英國英國英 LONG, vacant office opposite one of the principal hotels in Kansas City, Mo., had found an attractive tenant. Very rapidly all the indications of neglect disappeared under the vigorous superintendence of a cheery faced, brisk little woman, who unceremoniously ejected the spiders, and cemented the entrances through which many mice came and went hitherto without fear of molestation.

a dusky faced "artist in lime" pre sided for a few hours, and was followed by a painter, who eyed the brisk little lady tenant very critically while obeying her orders.

One after another added specimens of their skill and were dismissed, until, in the full splendor of a bright-hued carpet, lace curtains, burnished chandellers, tasteful furniture, and all the little odds and ends that go to prove a woman's presence, the occupant felt that she was "at home."

Then at the foot of her stairs, and on her entrance door, appeared some very modest signs, reading simply, "A. Badenheimer, M. D."

Scarcely had "the new sensation" in news opened its wings for a free flight over the city to announce the presence of the audacious female - who, of course, being "a stranger," must also be "an adventuress"--when she was called to the hotel over the way to attend one of the guests, who had been discovered by the chambermald in the delirium of a violent attack of fever.

The mandate, "Run for a doctor!" was obeyed by a veritable son of Erin, about "the lady doctor" which far ex-Ity that the sick man was beyond the reach of medical aid.

Very quietly Miss Badenheimer donned her neat hat, turned the key in slight incident which took place in her door, and crossed the street to visit | Union Square, before a store where the her first patient in her new home in the

Self-possessed, conscious of her ability, as well as her womanliness, she I saluted him I said: "Buying paint entered the room, where three or four men were vainly endeavoring to control the patient.

With a half muttured curse one of e man glanced contemptuously at the light figure and girlish face, and rude-

blurted out: I sent for a doctor-what brought

here?" am a physician, and came at your ding, fepilea the lady, very quietas she walked toward the window.

where the sick man was struggling in the hands of his captors. A slight start and a half-suppressed exclamation of surprise caused the first

speaker to say, emphatically: There's a woman doctor for you. Shows the white feather at the first

ugly sight." Apparently not heeding his words the lady placed her ungloved hand on the sick man's brow, saying, softly:

"You are very ill and must be quiet. Allow these men to place you on the Almost instantaneously a change came over the man, and he submitted,

without another word of remonstrance to the kindly attentions offered him by "Do you happen to know him?"

asked the landlord, rather abruptly, as be turned toward the little lady. I think that I have met him before to-day," she answered, "but there is no

od I must have a room Journal.

more remote from the noise of the street. He cannot recover here."

"Oh, then, you stick to his being your patient, do you?" rather sneeringly from the landlord.

"I certainly do," was the answer, in a tone so firm, and accompanied by a look so determined that no ordinary man would dare to gainsay either. "As might have been expected, "the docter" had her own way, retaining her position as physician and blending

The days went by with a scarcely perceptible change in the consuming fever so loath to relax its hold on an attractive victim, but in spite of the croakings, the indignations and illconcealed contempt, the change did come at last which promised and was followed by convalescence.

Then her patient became exacting of attention to such a degree as almost to scandalize some of the lady guests, who envied the doctor in her privilege of ministering to such a fine specimen of young manhood as the sick stranger appeared to be, during the brief space of time he had spent among them previous to his sudden prostration by an almost fatal illness.

After envy came surmise, and there were whispers of a "real romance" somewhere in the past of those two Must have touched his beart, with its muttered blame.

Solution broke, Must have touched his beart, with its muttered blame.

For once surmise was correct, and the romance culminated very unexpectedly to those who had watched and wonlives now so harmoniously mingling. dered.

For days telegrams had been speeding back and forth, to and from some unnamed place, the full tenor of which could not be quite ascertained by the most careful scrutiny of the lady who leaned over the banisters whenever she dispatched a messenger, to see that he hurriedly went on his way.

The telegrams were followed by the presence of Papa Badenheimer, a stout looking, evidently "well to do" and very jolly old farmer, whose hearty laugh and merry jokes enlightened the inquisitive as to the post of doctor and

"Anna," the old gentleman explained, was determined to be a doctor, arguing always that was "her sphere," and

that "she should never marry any one." Her lover bitterly opposed her professional ambition, until, at last, argument gave place to anger, and they parted, the one to seek the long-craved knowledge within the walls of a renowned medical school, where she won the first honors of her class, as well as her coveted diploma. The other went out from home with bitter thoughts and exaggerated ideas of his wrongs.

He was fast becoming a cynical man of the world when the fever, which was to him a good angel, came with such conquering power as even his vigorous frame could not withstand. Fate, or fortune, or special providence -call it what you will-had brought those two together again, the one helpless and suffering, the other strong and

When the doctor's battle with disease had ended, and the trophy was fairly won, she, too, struck her colors to another victor, whose warfare is not always so open as was hers. Against the wary warrior and time honored strategist, love, she was not proof, more than are any of her sex.

When her patient was able to travel the "Office" lost its tenant, the modest signs and pretty furniture were packed and sent away for the adorning of another home, the cornerstone of which would be laid in the farmhouse where her ambitious wings first tried their strength.

Dr. Badenheimer maintained always that she had proved her fitness for her profession, yet laughingly acknowleedged that a man's will, backed by his love and a woman's tender heart, in conspiracy, are certain some time to overcome the highest ambition an aggressive woman can hold.-New York Weekly.

A New Joe Jefferson Story.

I saw Joseph Jefferson during the first week of his "Rivals" revival in who returned in a state of excitement | 1880 at the Arch Street Theatre. Ten years later, when I knew him personceeded that produced by the probabil- ally, I found him off the stage as he was on-a charming companion. The only example of his dry humor that I can now recall was the result of a actor occasionally stopped to purchase painting materials. I was at his elbow as he alighted from his carriage and as for the country, Mr. Jefferson?"

He halted, and in those shrewd old eyes-Celtic eyes-was just the ghost

of a twinkle. "Better paint barns than the town, young man!" and he went into the shop for his tubes, brushes and canvas. It was characteristic of Joseph Jefferson.-World's Work.

United States Silver in Canada.

The Canadian banks are to be allowed a commission of three-eighths per cent. for collecting American silver and turning it over to the Government for export. This is not sufficient to tempt them into the business of importing silver for Governmental export, but is sufficient to induce them to impound and turn over all such coins coming their way. The fear which the Government has inspired regarding worn Canadian silver and the readiness of the banks to accept American silver may make the foreign coins more popular with the general public.-Toronto (Ontario) Globe.

Not Fully Cultured.

"Yes," said little Arthur, "since pa struck it rich, and ma and the girls have got into societs, we have a Frenchman to do our cookin', so we eat in French, and sing in Italian, and think mostly in German; but once in a while, when things don't go right and o lose in unnecessary talk. I pa gets mad, we still have the good old good nurse for him a strong. English right off the hat."—Chicago

Alleged Extravagance in the Agricultural Department.

SEC. WILSON HAS LARGE POWERS.

For Much of the Appropriations for the Agricultural Department There is No Return Except in the Shape of Scientific Data-

Washington, D. C. (Special).-As a result of recent disclosures concerning Botts. affairs in the Department of Agricultmake lump-sum appropriations for the

various bureaus of that department. The existence of this system is one of the explanations of the alleged extravagance of the present administration of the Secretary of Agriculture. Since 1902 Congress has appropriated, under 28 separate headings, the total sum of \$23,908,350. Except to keep within the general character of the broad headings under which these appropria-tions were made, Mr. Wilson has had practically unlimited discretion as to their expenditure.

In the annual appropriation bills, at least for the last five years, there has been made for each bureau, division or office a special provision for salaries. All officers, clerks and employes are enumerated and their respective salaries

The appropriation bills simply enumerate a large number of things which may be done by expenditure of this appropriation. For instance, under the head of general expenses of the Bureau of Forestry \$254,000 is appropriated "to enable the Secretary of Agriculture to experiment and to make and continue investigations, and to report on forestry, forest reserves, forest fires and lumbering, to seek through investigations and the planting of native and foreign species suitable trees for treeless regions," etc. But just how much or how little he shall expend for each purpose is not stipulated. So it is in the

Bureau of Plant Industry. For vegetable, pathological and physiological investigations \$110,000 is appropriated this year. A score of things which this may be used for are named but there is no specification as to the amount which will be spent for each.

When money is appropriated for the army or navy it is very carefully itemized. If the Naval Appropriation bill contemplates the erection of certain buildings at various navy yards each building and the maximum cost is stipulated. But in the Department of Agriculture it is different.

When the Weather Bureau, in 1903, desired to erect a new observatory the appropriation bill simply stated that \$50,000 was to be made available for the the largest ever harvested. purchase of a site and erection of the building. For 1904 the Weather Bureau Company was incorporated at Trenton, asked for another appropriation of \$50,- with a capital of \$12,000,000. 000 for the construction of five build ings, locations not indicated. Five more buildings were authorized in each of regarded as serious. the appropriation accounts for 1905 and

The 4ump-sum appropriations made for the various bureaus of the Department of Agriculture include the employment of assistance. There are few restrictions as to such employment. Under the lump-sum system if the chief of a scientific bureau has a particular hobby he can ride that hobby at the expense of other things which ought to be done through expenditure of lump-

sum appropriation. For much of the appropriations for the Department of Agriculture there is no return except in the shape of scientific data, and there is no way of determining whether the appropriation is eco-The scientists say nomically expended. that their discoveries are cheap at any

LONE ROBBER ON RAILFOAD TRAIN.

Killed One Man and Wounded a Woman-Escape and Capture.

Louisiana, Mo. (Special).-While a Chicago and Alton excursion train from Bloomington, Ill., to Kansas City was crossing the Mississippi River here a man on board shot and killed Marion Warner, of Secor, Ill.; shot and wound ed a woman and robbed a third passenger. After a hard fight the man was arrested and placed in jail here. He refused to give his name.

Warner was asleep when the man came through the train, asking people if they were armed. He awoke Warner and asked if he had a revolver. Receiving a negative reply, it is stated, he immediately shot Warner dead. The passengers were panic-stricken, and when holdup demanded of a passenger, whose named has not been learned, that he empty his satched, emphasizing his order with a flourish of his revolver, the passenger hastily poured out the contents of his satchel and the holdup took possession. The robber then fired at random in the car, and one woman the torpedo boat.

was shot through the arm. A boilermaker from Jacksonville, Ill., attempted to arrest the man, but was knocked senseless. Other passengers rallied from their fright and the man was overpowered

and held until the train stopped here,

when he was turned over to the author-

ities and placed in jail. Claims were made by several that the holdup was drunk, and had boasted openly that he would kill somebody. According to the statements of the passengers, it may be difficult to deter-

000 Samuel Bernstein, a master baker of Roebling street, Brooklyn, is dead, and Isaac Feder, his assistant, is in a critical condition, as a result of a mysterious assault by a man armed with a pistol, who entered Bernstein's shop and opened fire

upon the two men. Before dying Bernstein identified John Cipriano, 10 years old, as his assailant. Young Cipriano, who is in custody charged with the crime, was recent treated in a Brooklyn hospital for gunshot wound, the origin of which he would not explain, saving that he would settle his score himself as soon as he re-
